

Errata Sheet for the Printed Version of the SADRC

Business Ownership Value by Gender

For this measure, the decimal should be moved two places to the left to get the proper value (reported “in thousands”).

Business Ownership Value by Race

There are two points to be aware of for this measure. The figures reported are the actual values (not “in thousands” as indicated on the chart). Second, the figures for this measure are extracted from an older data table produced by the Small Business Administration. For the most current estimates of firm data for race and ethnic groups by state, please see the tables available from the U.S. Census Bureau’s Economic Census.

Private Loans to Small Businesses

The figures here are reported are the actual values (not “in thousands” as indicated in the chart).

The website reflects the corrected version of the Report Card.
